

ShaharKagan

Senior UX/UI Expert

I have worked in various roles: from product designer, Ux/UI expert, and product manager. I have been involved in a wide range projects including Cyber Security systems, big data organizations, market places, automatization tools, QA and monitoring tools, a broad variety of dashboards, and more...

I have a strong understanding of all aspects of the product development lifecycle. My work includes concept creation, prototyping user flow, vizualizing data, feature prioritization and product specs, product strategy, requirements, UI design, A/B and usability testings.

Born in 1982, husband & father, living and working in Tel Aviv.

EXPERIENCE (as employee)

2016 - 18

Time to Know - UX/UI/Product

After receiving the market demands and understanding the user needs and feature requirements, my role was to create the UX and UI of the features according to the roadmap. Over time I functioned as product manager and lead the entire process.

2016

Crossrider - UX/UI Lead

As part of the Product team my role was to lead the UX processes and guide the UI designers while we built the new company platform.

2014 - 15

Inkod Hypera - UX

As UX expert I designed interfaces for Cyber security start-ups, dashboards for big data platforms, applications, websites, eCommerce and more...

2013 - 14

Taga - UX/UI

Designed interfaces and navigation systems for medical instruments and industrial products.

2012 - 16

H.I.T - Product Design Instructor

Academic lecturer in Product Design department, and mentor for Bachelor candidates' final projects.

2010 - 12

Hirsch - Rapid Prototype

Worked with 3D printing machines, silicone molds and the leading edge of the rapid prototyping technologies.

EXPERIENCE (as freelancer)

2017

StoreMaeven - App store optimization

Working under the guidance of the CEO with the product needs, we presented all the data that the user needs in order to decide his next step of better app-store performance.

2016 - 17

Wirex Systems - CyberSecurity

Defining UX and creating the UI for a Cybersecurity system. Working closely with the Dev team while creating the user flows and delivering the UI.

2016

Ayehu - QA automation

Define User Experience research & execution for QA automation systems.

2015

Plan.Me - Network / marketplace

Creating the UX for home renovation projects, including conceptuation, prototyping, user testing and design.
